Subject: MIP Price List and Specific Conditions Announcement

14.01.2025

Dear Business Partners,

At Mersin International Port, we are committed to providing high-quality services to all our stakeholders and customers in 2025, continuing our dedication to service excellence.

To better support international trade in our region, MIP plans to introduce a TEU-based tariff system, which will include different rates for 20FT and 40FT containers, applicable to both full and empty containers. This change is designed to strengthen local trade.

As part of this initiative, MIP will significantly reduce the container handling fee for 20' export and import laden containers, boosting the competitiveness of exporters and importers. Furthermore, we will lower the handling fee for empty 20FT containers, helping shipping lines reduce costs associated with repositioning empty containers in Mersin. Overall, these changes aim to reduce port and logistics costs for exporters in the region.

The abovementioned and attached tariff will be applicable as of 10th February 2025.

We would like to inform our stakeholders and valued customers that we will soon provide details on a new process allowing end customers to pay the tariff directly. This will be limited to the laden container stevedoring (loading and discharge fees) and export laden container storage. This change will help reduce costs for end customers and support trade. The date of application will be advised shortly.

You are kindly requested to circulate the subject announcement to your members and related parties.

MERSIN INTERNATIONAL PORT
